

TransCanada Calibrations

Pressure & Temperature Laboratory

TransCanada Calibrations operates an accredited environmentally controlled primary standards pressure and temperature laboratory that serves the Energy, Aerospace, Biotech, and Scientific sectors.

The instruments used for calibration are National Standard Quality, and are traceable to NRC Canada and/or NIST United States. The laboratory is operated according to ISO 17025 Standards.

Instrument Calibration & Repair Services:

Pressure Device Services:

- ↗ Pressure Range High Vacuum to 15,000 PSI
- ↗ Calibration of Pressure Transfer Standards, Dead Weight testers, barometers
- ↗ Primary Standards Traceable to National Standards
- ↗ In-house instrument repair service
- ↗ ISO 17025 Certificate

Temperature Device Services:

- ⇒ Temperature Range -40c to +600c
- ⇒ Calibration of thermometers, temperature transmitters, dry blocks
- ⇒ Primary Standards Traceable to National Standards
- ⇒ In-house instrument repair service
- ⇒ ISO 17025 Certificate

Other Measurement Services:

- ↗ On-site Technical Services and Training
- ↗ Instrument Selection and Supply
- ↗ Quick Turn-Around Times
- ↗ Calibration Solutions
- ↗ Mass Calibration
